**TASK 1 | ORIGINAL QUESTION**

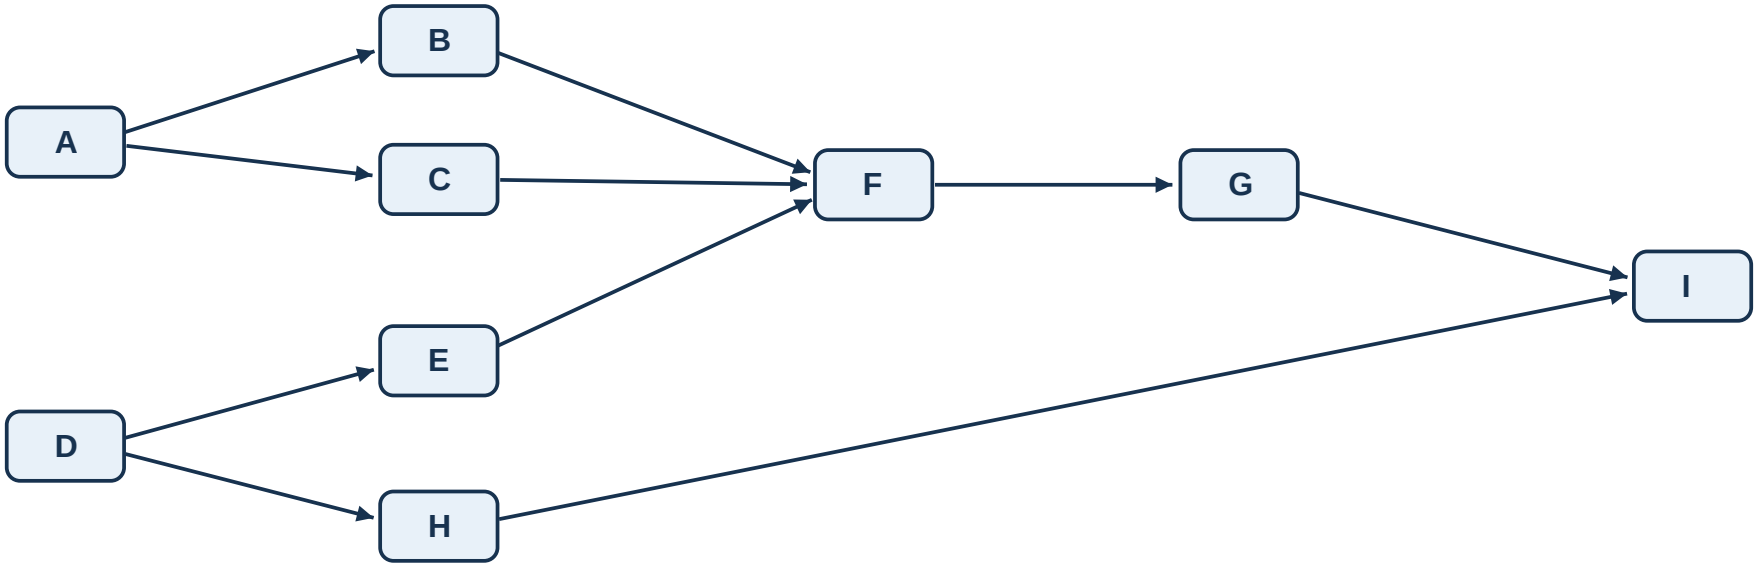

| Activity | Predecessor |
|---|---|
| A | - |
| B | A |
| C | A |
| D | - |
| E | D |
| F | B, C, E |
| G | F |
| H | D |
| I | G, H |

# TASK 1 | PERT AND GANTT CHART SOLUTION

Source: Section 2, Task 1 - Activity / Predecessor table

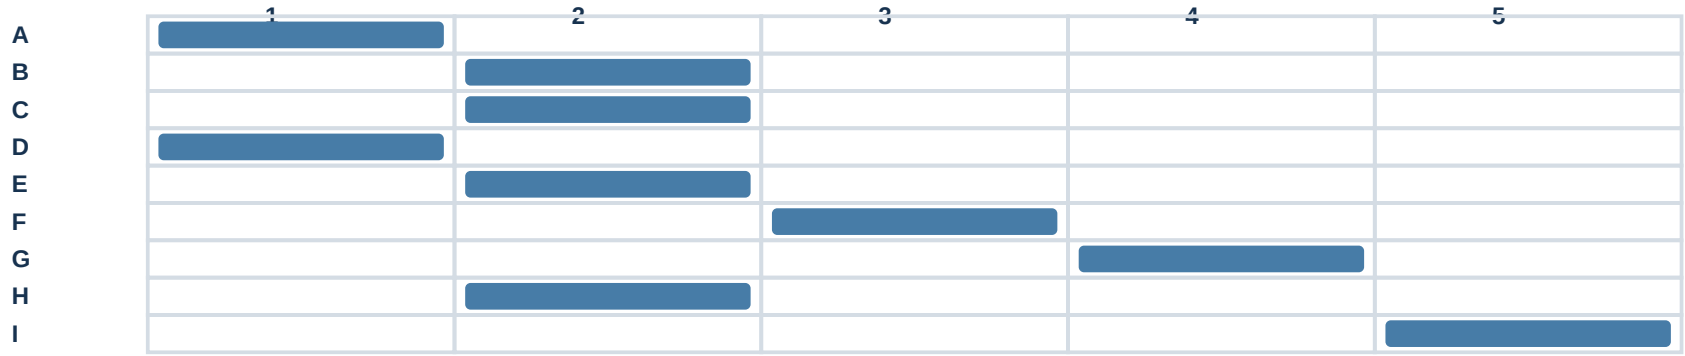

## 1. PERT precedence network (Activity-on-Node)

**Precedence check:**

Start: A, D | F requires B + C + E | G follows F | I requires G + H.

## 2. Gantt chart - illustrative only (assume each activity = 1 time unit)

Note: The question provides no durations. Actual Gantt timing, total duration and critical path cannot be determined.
