TASK 1 | ORIGINAL QUESTION

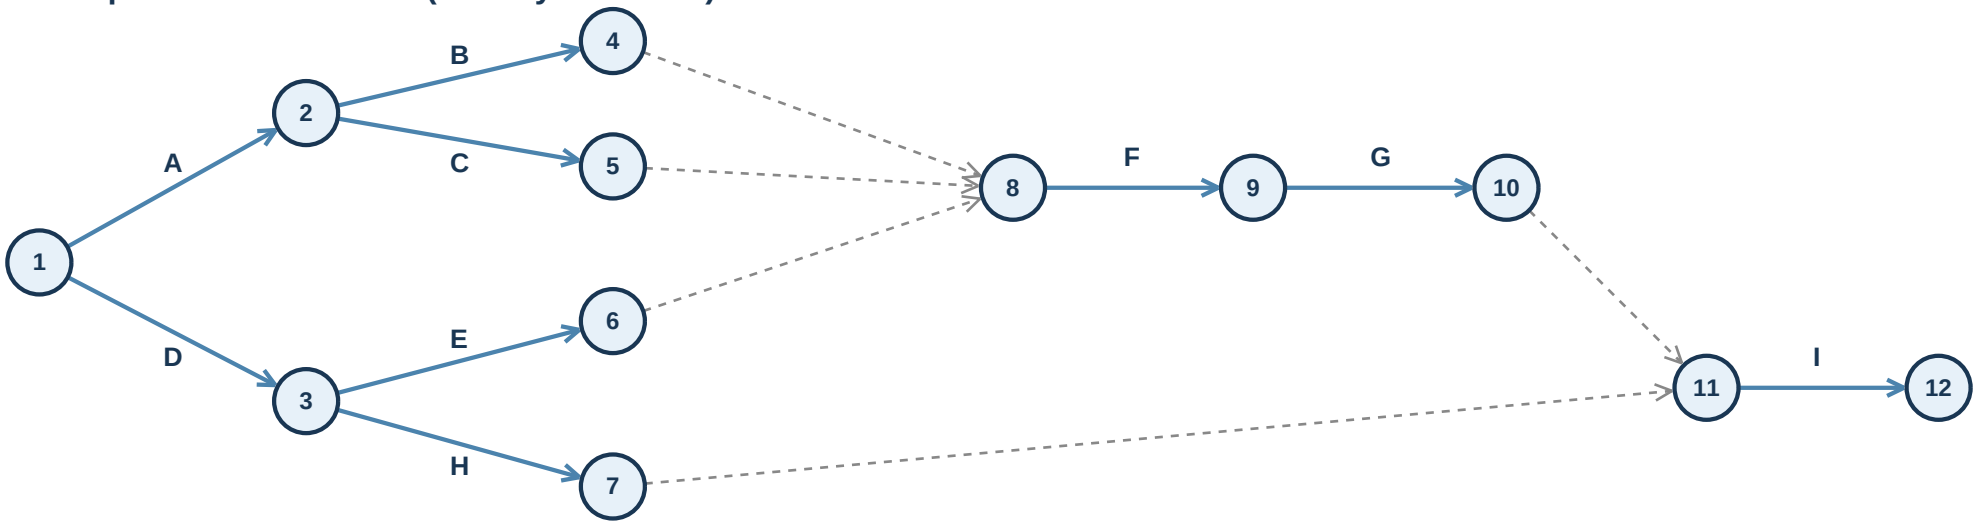

Activity	Predecessor
A	-
B	A
C	A
D	-
E	D
F	B, C, E
G	F
H	D
I	G, H

TASK 1 | PERT AND GANTT CHART SOLUTION

Source: Section 2, Task 1 - Activity / Predecessor table

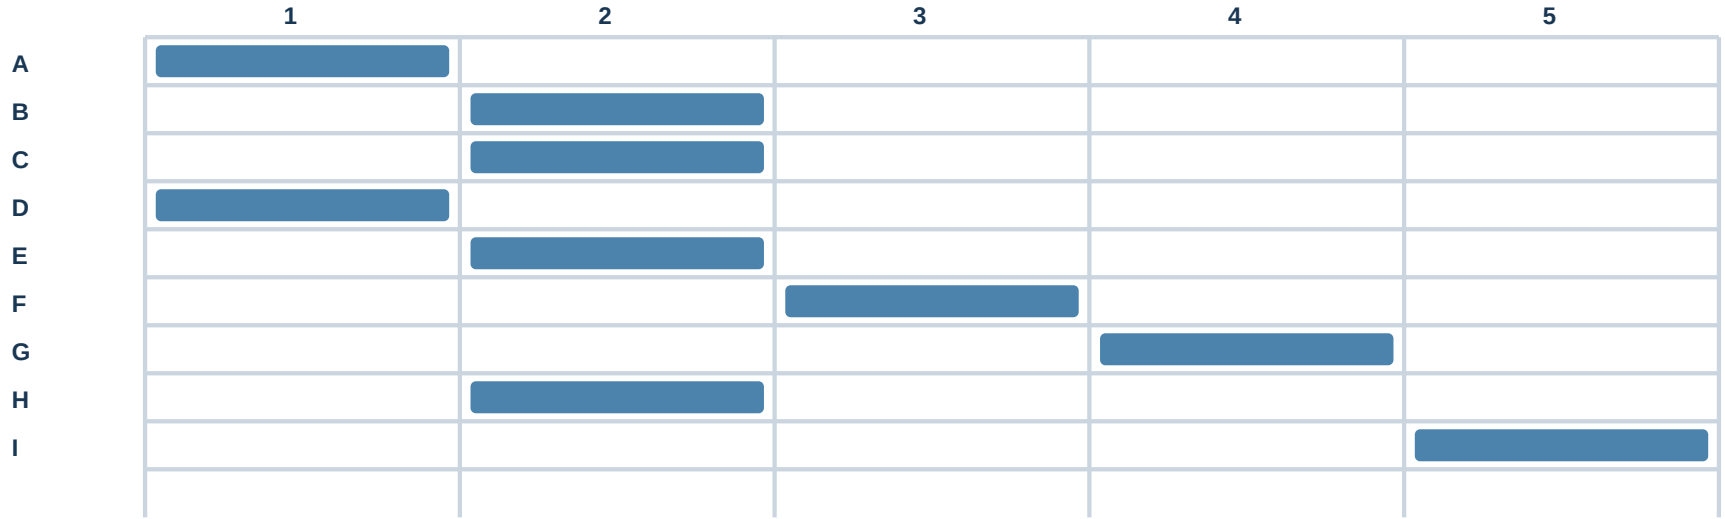

1. PERT precedence network (Activity-on-Arrow)

Dashed arrows = dummy activities (zero duration), used to preserve dependencies.

A and D start; F waits for B, C and E; G follows F; I waits for G and H.

2. Gantt chart - illustrative only (assume each activity = 1 time unit)

Note: No durations are given. Actual Gantt timing, total duration and critical path cannot be determined.
